AMENDMENT # 2

DATE: December 2, 2009

TO: All Bidders of Record

FROM: Greg Van Wart, Buyer

SUBJECT: Amendment # 2 to T-2780 “Public Safety Building”

This amendment becomes part of the Contract Documents and modifies the original bidding documents as noted below:

Changes, Additions and Clarifications as follows:

Reference Sheet:
D1 - Key note 11 – Revise to “REMOVE ELECTRICAL PANEL”

A6 – Elevation 5 and Isometric views - Front and side surfaces of reception casework shall be plastic laminate over MDF.

MO – Domestic hot water heater – Add Rheem manufacturing as an acceptable manufacturer.

Project Manual

Section 07540 3.3 A - Delete requirement for a vapor retardant between insulation and roof deck.

Section 15350 -2.4 A & B Add Red Valve Corporation as an acceptable Manufacturer

Section 15401 -2.4 A & 2.7B Add Red Valve Corporation as an acceptable Manufacturer

1) Reference Sheet E1, note 39. This note references supplying 24”x4” Cable Tray and fittings. The note does not show up on the floor plan and the enlarged drawing of the IT room indicates that the Cable Tray is by CNM. Please clarify.

Answer: This was addressed in addendum 1, noting that the contractor shall provide the cable trays.
2) Reference Sheet E1, note 40. This note references supplying a Tele/Power Pole for connection of the Wiremold. This note does not show up on the floor plan. How many of these tele/power poles are to be supplied and where exactly are they to be located?

**Answer:** Power poles were discussed to serve the reception counter but were deleted. Sheet A1, note 2 calls for sawcut and patch to serve that area under floor.

3) Is electrical panel A an existing panel or a new panel? Page E1, Enlarged Detail of Electrical room denotes Panel A as New.

**Answer:** Page E2, Panel Schedule for Panel A lists this panel as Existing. Panel A will be a new panel.

4) Electrical panel called out on KN 11 of page D1 is to be relocated to where? Neither architectural nor electrical floor plan identified a relocated electrical panel.

**Answer:** This is the existing panel A location the decision was made to install a new panel A, not relocate it.

5) Is Caterpillar the only Generator approved on this project?

**Answer:** The design was based upon Caterpillar equipment. Alternatives will be acceptable but it will be up to the contractor to show that proposed substitutions are equal to specified equipment.

6) Please clarify the duration allowed for the CNM Public Safety Building project. The specs state both 145 days and 180 days.

**Answer:** 145 days

**NOTE:** Bid Due Date and Time has been Extended to Thursday December 10, 2009 at 3:00PM

All other specifications, terms and conditions remain unchanged. Bidders are required to acknowledge receipt of this Amendment in the space provided on Bid Response Form, Section 00200-1.
