NOTES:
Chair pads are recommended under office chairs with roller casters to preserve appearance retention, act as a deterrent toward delamination and to avoid premature or accelerated wear. Clean Step® walk-off tiles or walk off mats are recommended at building entryways to reduce soiling.

Product specifications are derived from averages resulting from normal manufacturing tolerances in yarn, fiber fabrication or finishing, and may vary within normal industry tolerances. Construction value quotes are "at point of manufacture”. Performance is not affected by these variables

Due to the nature of modular patterned textile products, an exact pattern match cannot be guaranteed. Some visual inconsistencies in the surface appearance of all textile products should be expected, including visible seams.

Carpet should be installed according to manufacturer’s carpet installation procedures.
