DATE: Friday, May 24, 2013
TO: All Bidders of Record
FROM: Greg Van Wart, CNM Sr. Buyer
SUBJECT: Amendment/Addendum #1 to T-2900 “Dust Control and Parking Barriers for Westside Campus”.

This addendum becomes part of the Contract Documents.

Bidders are required to acknowledge receipt of this addendum in the space provided on page 10, Section E.1.

Changes, Additions and Clarifications as follows:

Question: What is the existing static pressure?
Answer: 65 lbs

Question: What is the water pressure?
Answer: 65 lbs

Question: What size pipe (diameter) is to be used for the irrigation/sprinkler system?
Answer: 1 inch and 1-1/2 inch

Question: What schedule pipe is to be used for the irrigation/sprinkler system?
Answer: Vendor’s choice

Question: How many feet of pipe are to be used for the irrigation/sprinkler system?
Answer: Will depend on which size sprinkler you use to cover the desired area for dust control

Question: How many independent circuits are desired for the entire irrigation/sprinkler system?
Answer: That will be determined on size of sprinkler you use to cover the area for dust control

Question: Is the new system tying into and existing system?
Answer: Yes it is tied into an existing system. There are two lines to be use a 1” and a 1 1/2” line for tie in.

Question: What type of valves, timers, heads (coverage, spread, width, etc.), pipe size(s) and back flow prevention, etc.
Answer: You can use PVC or poly any size you need to complete the job

Question: Concerns regarding the accuracy of the square footage
Answer: 142,624. There are road ways that get used in the same area

Question: What maintenance or warranty do you require as a minimum?
Answer: One year for the Irrigation only

**Question:** Clarification on the placement of the boulders, spacing, depth and use of weed fabric.

Answer: Boulders were to be placed about 5 feet apart on the ground, a weed barrier to be placed under each boulder and the gravel placed back around each.

**Question:** What are the requirements for the silt fencing? Types of posts, post spacing?

Answer: The silt fabric is to be hung on the existing fence. The panels should be 6’ x 50’ long green in color with quick ties to hang the fabric on the fence.

**Question:** What types of irrigation heads are required, brand and model?

Answer: The irrigation is for dust control. No brands are required or model Contractor choice.

**Question:** Are swing joints required?

Answer: No swing joints are required.

**Question:** What size valves are required?

Answer: Whatever size need to set up the irrigation system.

**Clarifications:**

- Sprinkler systems also require a MM1 and/or MS06 license.
- CID permitting maybe required by the contractor, this is the contractor’s responsibility.
- Insurance is required no matter what the dollar amount.

Reference attached non-mandatory meeting sign in sheet.

**NOTE:** Due date and time has been Extended to May 31, 2013 at 3:00PM
