AMENDMENT # 2

DATE: May 6, 2014

TO: All Bidders of Record

FROM: Krista Colón, Buyer

SUBJECT: Amendment #2 to T-2927 “Dental Chairs, Stools & Lighting”

This amendment becomes part of the Contract Documents and modifies the original bidding documents as noted below:

1. QUESTION: Under Specifications 10.10 it states Standard Controls for the Dental Chair should be located on a Programmable Touch Pad mounted on the Assistant's Instrumentation Panel. The Assistant's Instrumentation Panel is normally located on the Assistant's Instrumentation Left/Right Arm Assembly and is part of the Delivery Unit with Handpiece Control Console. I just want to verify if you are needing the Left/Right Handpiece Control Console and L/R Arm Assembly.

   ANSWER: We are looking for touchpad controls on the arm assembly to control chair positioning.

2. QUESTION: In addition to the Touch Pad Control, does the Rear Left/Right Assistant's Instrumentation Arm have a Saliva Ejector, High Volume Evacuator Valve, and Air/Water Syringe?

   ANSWER: According to the specs: "Air and water quick disconnects should be mounted to the dental chair upper structure in an easily accessible location. Air and water should be indexed to prohibit accidental crossover"; therefore, the rear left/ right assistant's instrumentation arm does not require the saliva ejector, or HVE or A/W syringe just the ability to access the location with the quick disconnects. These items that you are questioning will be part of the delivery system and we are just getting the chairs, stools and lighting at this time.

BIDDERS ARE REQUIRED TO ACKNOWLEDGE RECEIPT OF ALL AMENDMENTS IN THE SPACE PROVIDED IN SECTION E.

All other specifications, terms and conditions remain unchanged. The due date and time is Friday May 9, 2014 at 3PM local time.
