

Disability Resource Center Referral Form

Referral to Disability Resource Center should be based on the presence of an obvious physical disability or apparent learning problem as evidenced by poor performance in your class. A description of the performance problem would be appreciated.

If you have a student who has other problems, such as poor attendance or unrealistic choice of major, they should be referred to an advisor rather than Disability Resource Center, unless they also appear to have a disability (in which case Disability Resource Center is appropriate). Students referred to an advisor should not be listed on this form. Please print your name at the bottom. Thank you.
