## Central New Mexico Community College (CNM)
## Graduate Outcomes, FY1718

**Approach and Methods**

The goal of this report is to provide continuing education and employment information of recent CNM graduates. This information is used by CNM to: fulfill federal reporting requirements, provide information to programs for accreditation purposes, provide information to schools and executive leadership for decision-making purposes, and inform the public and prospective students about CNM's graduate outcomes.

**Data Sources**

- Electronic and phone surveys with graduates (employment, wage, and continuing education information)
- Emsi (employment information)
- Information from CNM programs (employment information)
- National Student Clearinghouse (continuing education information)
- New Mexico Department of Workforce Solutions (employment information)
- Public information from public employers' websites (employment and wage information)
    - Albuquerque Public Schools (APS)
    - Bernalillo County
    - Central New Mexico Community College (CNM)
    - City of Albuquerque
    - City of Rio Rancho
    - University of New Mexico (UNM)

**Continuing Education Information**

The National Student Clearinghouse is the primary data source for continuing education information and the graduate survey serves as a secondary source of information. The National Student Clearinghouse information includes enrollment, school name, and declared major during a specific timeframe. Because some schools do not participate in the National Student Clearinghouse, the graduate survey is used to report any continuing education for schools that do not report information to the National Student Clearinghouse. Additionally, declared majors are not included in this report for those graduates continuing their education at CNM because they are not required to update a declared major after receiving an award.

**Employment Information**

Employment information is obtained from a number of different sources including the graduate survey, CNM programs, Emsi, New Mexico Department of Workforce Solutions, and publicly available information from public employers' websites. The New Mexico Department of Workforce Solutions is the primary source of data in determining whether a student was employed after graduation; this information, however, is limited in that it does not include job title or employer name so we cannot determine whether a graduate is working in a training-related field. Majors with less than 5 graduates are included in the graduate and overall CNM school totals in this report, but cannot be viewed individually (by major) in order to protect student privacy; these majors are combined into one category called "All Other" in the Snapshot by Major and Employment Information tables.

*Prepared by the Office of Planning and Institutional Effectiveness (OPIE)*

**Training-Related Information**

Training-Related indicates whether or not a graduate is employed in a field related to the degree(s)/certificate(s) received. Training-related information is obtained from the graduate survey, CNM programs, Emsi, and publicly available information from public employers' websites. Graduates and CNM Programs may indicate whether employment is training-related; however, when employment information is provided but doesn't indicate if it's in a training-related field, OPIE will provide a training-related designation based on job title, employer, and major. OPIE subsequently reviews all training-related designations and confirms them with the CNM program/schools. Training-related information is not included for Liberal Arts, General Studies, and Integrated Studies. It should also be noted that most of the employment information obtained does not include a training-related designation; therefore, it is likely the number of graduates who are employed in a training-related field is higher than the reported values due to the number employed in unknown fields. The training-related population reported includes all graduates except for those who are employed in an unknown field, and the training-related percentages are based on the training-related population.

**Wage Information**

Wage information is obtained from graduates and publicly available information from public employers' websites. These sources did not include a sufficient number of graduate wage information to include in this report.

The Graduate Outcomes Report is generated annually by the Office of Planning and Institutional Effectiveness (OPIE). If you have any questions regarding this report, please contact OPIE at OPIE@cnm.edu.

**Training-Related Population**

| Employed in Field | Employed out of Field | Cont. Ed., no known Emp. | No known emp. and not cont. ed. |
|---|---|---|---|
| 32% | 14% | 24% | 30% |

Note:

Training-related population includes all graduates except for those who are employed in an unknown field. Training-related percentages are based on the training-related population. It is likely the number of graduates who are employed in a training-related field is higher than the reported values due to the number employed in unknown fields.
