

Central New Mexico Community College (CNM)
Graduate Outcomes Report
Summer 2018 – Spring 2019 graduates

Methodology

This report provides information about the continuing education and employment activities of recent CNM graduates. This information is used by CNM to: fulfill federal reporting requirements, provide information to programs for accreditation purposes, provide information to executive leadership for decision-making purposes, and inform the public and prospective students about CNM's graduate outcomes.

Continuing Education Information

Graduates are recorded as “continuing education” if the National Student Clearinghouse reports an attendance at a college or university during a term beginning in the 12 months following their graduation date. The National Student Clearinghouse only has enrollment records from participating colleges, so this method will lead to an undercount of graduates continuing education.

Employment Information

Graduates are recorded as “employed in the state of New Mexico” if the New Mexico Department of Workforce Solutions (NMDWS) reports earnings in a quarter beginning in the 12 months following their graduation date. NMDWS only includes employment records from employers participating in the state's unemployment insurance program, and so does not include graduates who are self-employed, work for the federal government, the military, or employers in industries not covered by unemployment insurance. Thus, this method will lead to an undercount of graduates employed in the state of New Mexico.

In-field Employment

Each degree and certificate program at CNM has been matched with industries that are most closely aligned to the field of study. The list of the industries matched with each program is included at the end of this report. Graduates are recorded as “employed in field” if they are recorded by the New Mexico Department of Workforce Solutions as working for an employer in an industry aligned with the graduates' fields of study. This methodology is based purely on the industry of the graduates' employers rather than the graduates' actual job titles.

Program listings

CNM's academic offerings are organized into six schools: Applied Technologies; Business and Information Technology; Communications, Humanities and Social Sciences; Health, Wellness and Public Safety; Math, Science and Engineering; and Adult and General Education. Rates of continuing education and employment are listed for each certificate and degree program that had at least 10 graduates. Certificate and degree programs with fewer than 10 graduates are grouped together within each school. Programs grouped in these “other” categories are listed below the data table.

School	Program	Graduates	% employed in NM	% in field in NM	% continuing education	% employed or continuing education	% employed and continuing education
